5. Claim 8, and 19-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hsieh (5065847) in view of Hofferbert (3335827). Hsieh teaches a luggage with upstanding walls, and a frame 20. The frame having a series of thin upstanding walls (note portion 22 is thin and a thickened edge portion (where bonded to portion 11). Hsieh meets all claimed limitations except for the autogenous bond. Hofferbert teaches that it is known in the art to provide autogenous bond. It would have been obvious to one of ordinary skill in the art to provide autogenous bond as taught Hofferbert to provide an alternative attachment method.

Regarding claim 23, note the foam layer and textile layer (abstract)
